DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 16, 2008 has been entered. The previous rejection is withdrawn pursuant thereto.

2. Claims 1-31 and 33 are pending. Claims 11-21 and 33 are still withdrawn from consideration as being drawn to a nonelected invention.

3. Claims 1-10 and 22-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bracho et al., US 6,021,443.

Bracho discloses, e.g. Figs. 1-15 and related text, a system for managing supply chain information comprising:

(a) a plurality of sub networks (130 and 140, each one of which comprises:

(i) a hub for containing common information (Hub A, Hub B and Hub C col. 10, lines 18-27 and col. 16, lines 21-52);

(ii) a plurality of data processing systems (102, 110, 104, 112 and 118) for issuing data messages to the hub (fig. 1 and 2 col. 16, lines 21-52);

(b) a communication system for communicating between the hubs of the plurality of sub networks (see fig. 1 col. 2, lines 53 to col. 3, line 12 and col. 4, lines 34-55), and

(c) a logic system in communication with each of the hubs for determining whether a data message from one of the plurality of data processing systems can be satisfied wholly within the sub network of which the one of the plurality of data processing systems is a member, or whether it must be satisfied within a remote sub network (fig. 1 col. 2, lines 53 to col. 3, line 12 and col. 10, lines 18-61); and

(d) uniquely identified events, e.g. 1210, 1222, 1404, and modification thereto, e.g. Fig. 15.

Bracho does not disclose trading partners. It is noted that trading partners in a commerce system have been common knowledge in the business data processing art. To have provided such for Bracho, e.g. systems 102, 104, 116, 118, would have been obvious to one of ordinary skill in the art.
